Product Catalog for Cultural Heritage

CULTURAL HERITAGE

Capture One CH Software

Based on the popular commercial software, Capture One Pro, Capture One CH is designed to support and enhance cultural heritage workflows from capture through post-processing by simplifying and automating post-production tasks.

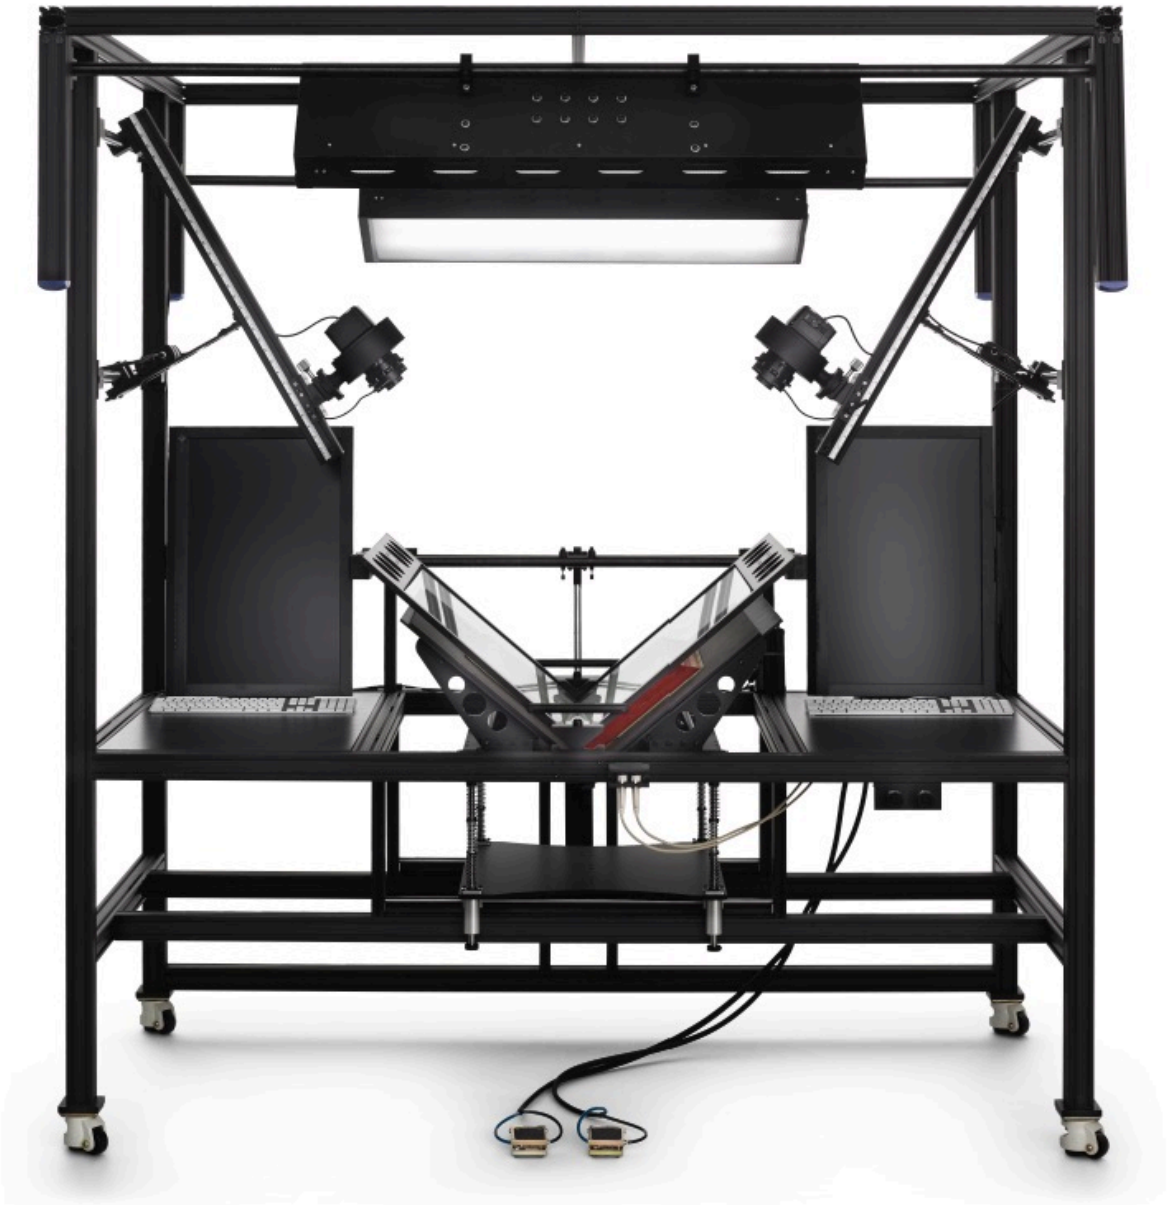
Reprographic Systems

It is easy to understand why our copy stands are world renowned for a few easy reasons: Custom made in America, distributed globally by Phase One, FADGI 4-Star & Metamorfoze imaging standards Certified, built from aircraft grade aluminum, easy to operate, & trusted by the best Institutions and Museums on the planet.

[su_button url=”/copy-stands/” background=”#ffffff” color=”#207d85″ size=”6″ radius=”0″ text_shadow=”1px 0px 0px #ffffff”]Learn More[/su_button]



Book Scanners

Bound materials require careful handling to ensure the process of digitization does not degrade their condition. This is especially important with tightly bound materials, delicate parchment, items with friable illuminations, and materials already in degraded condition. Each of our systems provides a range of handling options keeping the operator in control of the material, thereby ensuring their safety.

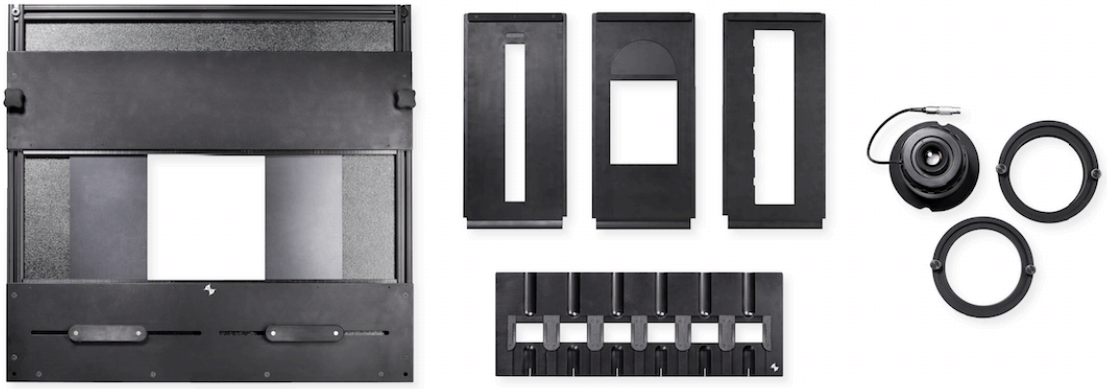
[spacer height=”30px”]



Film Scanning Solutions

At over 400 times faster than legacy scanning equipment, the new DT Film Scanning Kit (FSK) delivers high-speed, FADGI-4 Star compliant scanning at incredible resolution

Helping reduce both your scanning and post-production time.

[su_button url=”/film-scanning-kit/” background=”#ffffff” color=”#207d85″ size=”6″ radius=”0″ text_shadow=”1px 0px 0px #ffffff”]Learn More[/su_button]

[spacer height=”30px”]

Quality Assurance Software & Targets

ISA provides image quality targets, software, and consulting to the digital image archiving community. Their products enable quality control for the digitization of both transmissive and reflective material—from books to historic maps to artwork, baseball cards and more.

[su_button url=”/isa-targets/” background=”#ffffff” color=”#207d85″ size=”6″ radius=”0″ text_shadow=”1px 0px 0px #ffffff”]Learn More[/su_button]

[spacer height=”30px”]

Content Conversion Software

docWorks is the first software that converts scanned pages to searchable and metadata enriched digital objects in one seamless workflow. From the import of the scans to the export as standardized formats, libraries and archives stay in full control of their files and do not have to deal with incompatibilities of modules or lost data shipments.

[su_button url=”/ccs-content-conversion/” background=”#ffffff” color=”#207d85″ size=”6″ radius=”0″ text_shadow=”1px 0px 0px #ffffff”]Learn More[/su_button]

[spacer height=”30px”]

basICColor Profiling Software

basICColor offers calibration and profiling tools for all input and output devices – digital camers, scanners, monitors, proof printers, fine art printing, large format printers, digital production print systems and presses – softproofing applications, workflow tools for preflighting and processing images and pdf documents and QC applications for softproof, proof and print.
